Registration using Single Sign-On (SSO)

Clients can use Concur for Mobile Single Sign-On (SSO) for mobile login. By using SSO, users can log in to the mobile device using their regular corporate login and password instead of having a separate one for the mobile device.

Instead of the login and mobile-only password (PIN), the Mobile Registration page provides a Company Code that users must enter on the Company Sign In screen on the mobile device (described below).

Sign-in on mobile devices

Company Code = ELKA2
